SAMPLE PLOTTING INSTRUCTIONS:

- Set plotting parameters per problem requirement.
- Write .PDF file.
- Copy .PDF file to USB drive**.**

SPECIAL NOTE:

-You are encouraged to run sample plots during the practice session to ensure proper settings.

-You must submit your .PDF file on USB drive to the contest chairperson prior to leaving the contest area.

- The Technical Committee/Judges will plot your solutions.

PLOTTING:

Contestants should configure their software to be able to render their drawing into a.PDF file format. You may set up no more than three (3) different line widths:

0.18 mm
0.25 mm
0.70 mm

Further plotting instructions as to scale, colors, etc. may be given as part of the contest problem.

All contest drawings created on the computer will be saved on disk(s) provided in the drawing file format for that software AND as a .PDF file.

SAMPLE/TEST PLOT:

In order to ensure that all contestants will be able to plot their drawings properly, the following drawing is offered as a sample layout that could be used to test the plotter configuration during the set-up and familiarization period on Sunday. The drawing is a simple B-sized drawing sheet with borders and a simple title block. Details for the title block are provided, if you wish to use them, in the detail shown. Feel free to add any drawing you like in the blank area on your sheet, save it as a .PDF file, and plot a test print at the contest plotting stations.
