Technical Specifications

Technical Specifications

CareerTech Testing Center online testing is designed for Internet-accessible machines to have the least client system requirements possible. Due to its interactive nature, CTTC requires the following:

- PC users must use Internet Explorer 7 or above or Mozilla Firefox 3 or above.   For Mac users, Firefox 3.x . No Safari and no Chrome is supported.
- Active Scripting (JavaScript) enabled.
- Cookies enabled. Note, CTTC uses cookies for session management only and are deleted when you the testing session ends.
- Secure Sockets Layer (SSL) encryption supported.
- IT staff should ensure that the network security settings allow an unbroken connection to a website without activity for at least 90 minutes. If your internet connection is lost during the assessment, a box will appear when the submit button is clicked letting you know that the connection has been lost. If you can re-establish the connection, try to click on submit again to submit the assessment.

The CareerTech Testing Center also suggest the following network settings be checked before testing occurs:

- Due to the fluctuating signal strength of a Wi-fi connection, it is highly recommended that you avoid using a Wi-fi connection for testing purposes.
- Internet Traffic allowed on port 80
- Firewall filters set to allow the following as trusted sites -
