outcomes

- Higher Self Esteem
- Sense of Achievement
- Increased Performance on Standardized Tests

Measurable Results for Special Needs Populations

KeyTrain is a perfect fit for special needs students! We all know that special needs & at-risk youth need additional tools to help them succeed in education, the workplace and life. KeyTrain, an interactive self-paced curriculum and learning tool, is based on the nationally recognized ACT WorkKeys® skills system and has a proven track record of increasing basic skills for the special needs student while preparing them for the National Career Readiness Certificate™ based on WorkKeys.

In a recent study of the Georgia High School Graduation Test, data showed a score increase of more than 60% for special needs students that used the KeyTrain curriculum. Dr. Jeremy Dockery of Baldwin High School, author of the study, describes KeyTrain as “a powerful curriculum.”

The KeyTrain curriculum includes nine full academic/work-based courses including Reading for Information, Applied Mathematics, Locating Information, Applied Technology, Writing, Business Writing, Teamwork, Observation and Listening. These skills are linked to a real-world “job profile database” within KeyTrain that shows what level is needed for each of these skills within specific occupations and provides a clear career path for the student.

KeyTrain starts with a short locator test (which can be contextualized for the 16 Career Clusters) in order to place the student at the appropriate level of the curriculum and then automatically assigns lessons based on components of their IEP and/or job preparation goals.

KeyTrain also provides the student with 200 courses in “soft skills” such as resume writing, job search, time management etc...skills necessary for work and life.

Motivation is the key to improving student achievement. With KeyTrain, special needs students can easily see how their education links directly to skills needed in the workplace. Equipping students with work-based skills and giving them the opportunity to earn a National Career Readiness Certificate builds their confidence and sets them up for success!

RESULTS speak for themselves:

Georgia High School Graduation Test

AT-RISK STUDENTS PASSING	KeyTrain Users	Non-KeyTrain Users
MATH	94%	57%
ENGLISH	96%	76%
