Evaluator(s) _____

*career***tech**

The Oklahoma Department of Career and Technology Education uses this instrument to evaluate occupational programs according to the program standards approved by the State Board of Career and Technology Education.

INTRODUCTION

The Summary Evaluation Questionnaire was developed to assist in evaluating the instructional processes of occupational programs. It is designed for use by both the local teacher in conducting a comprehensive self-evaluation and by an external evaluation team. The questionnaire is divided into 11 sections, corresponding to the 11 standards of quality program operations. These standards or “best practices” have been endorsed by the State Board of Career and Technology Education.

Each standard is followed by a series of rating scale questions or Quality Indicators that further define the standard. Some questions are identified as State Board Rules, and these questions must be met in order to meet the standard. The Quality Indicators may vary among occupational divisions due to unique considerations within those divisions. The sum total ratings of the State Board Rules and Quality Indicators below each standard will serve as a measure of the standard. The rating of each standard and the corresponding narrative section will be recorded and reported in the final evaluation report.

DIRECTIONS

Evaluators using this instrument should strive to rate the Quality Indicators for each program evaluated in relationship to the standards. Comparing one program with another may result in distorting evaluative information and is highly discouraged.

Questionnaire Rating

To complete the questionnaire, carefully read each standard and the Quality Indicators that follow. Questions related to State Board Rules are enclosed in a shaded area and are grouped at the beginning of each standard. For each question, the evaluator should indicate if the State Board Rules are **met** or **not met** by marking the appropriate box in the column on the right.

- Met
- Not Met

All other Quality Indicators are assessed by circling the appropriate rating in the column on the right. The numbers on the rating scale indicate the following:

Exceeds Standard	5 = Outstanding 4 = Above Minimum Standard
Meets Standard	3 = Meets Minimum Standard
Falls Below Standard	2 = Below Minimum Standard 1 = Poor (Major Improvement Needed)

Suggested Activities for Evaluator

For each standard, there is a suggested list of documents to review or activities to perform as the evaluator rates the standard. The evaluator should use these suggestions as a guide but not as a limitation in reviewing the program.

Narrative Comments

The Comments Section of the questionnaire should be used to note specific program characteristics for which recommendations or commendations need to be made. Items rated below standard should be accompanied by realistic statements on how they can be improved. These notes should be used to write the Commendations and Strengths Section, the Specific Recommendations for Improvement Section, and the General Suggestions for Improvement Section at the conclusion of the evaluation (see pages following Standard 11).

Scoring Totals (Evaluators Only)

To determine if a standard is met, the evaluator should:

1. Determine if all State Board Rules are met.
2.
 - a. Sum the ratings in the column on the right to find the total points.
 - b. Compare the Total Points to Minimum Points Required to Meet the Standard as stated at the end of the standard.
 - c. If any questions were not applicable, use the chart at the end of the standard to determine the Minimum Points Required to Meet the Standard. (The Total Number of Questions Rated should include the questions related to State Board Rules.)

Example

Sum the ratings in the preceding columns 45 Total Points

In order to meet the standard, all State Board Rules must be met and the total points must equal or exceed 36 points.

If any questions are not applicable, the chart below can be used to determine the total points needed to meet the standard. (The Number of Questions Rated should include the questions related to State Board Rules.)

Total Number of Questions Rated	14	13	12	11	10	9	8	7	6	5	4	3	2	1

INSTRUCTIONAL PLANNING AND ORGANIZATION

STANDARD ONE

The instructional program should be designed to impart knowledge and develop skills that are essential for success in meeting the students' occupational objectives. There should be evidence that each instructional unit has been properly planned and organized and is being implemented in a sequential manner. The program should implement a fairly administered grading system that is based upon identified criteria.

The course of study for each occupational program shall include both theory and skill lessons along with other supplemental learning activities that will serve to guide the program toward desirable learning outcomes. In addition, the course of study shall be integrated and organized in such a manner as to effect an overall well-balanced program of instruction.

QUALITY INDICATORS

QUESTIONS TO WHAT EXTENT:	SUGGESTED ACTIVITIES	
<p>1. Does the instructional planning and organization provide adequate opportunity for occupational experience (shadowing, work-based learning) for each student to develop the necessary skills and competencies needed for employment?</p> <p>COMMENTS:</p>	<p>Review instructional plan to determine if it includes work-based learning and shadowing.</p>	<p><input type="checkbox"/> Met <input type="checkbox"/> Not Met</p>
<p>2. Is instruction directed toward appropriate and clearly formulated objectives with input from partnerships such as community, business and industry, local administration?</p> <p>COMMENTS:</p>	<p>Review the annual instructional plan and minutes from program advisory committee meetings.</p>	<p><input type="checkbox"/> Met <input type="checkbox"/> Not Met</p>
<p>3. Is a program strategic plan in place that is revised annually and that provides strategies to address curriculum/technology updates, instructional materials, professional development, equipment and supplies acquisition, budget development, facility renovation, advisory committee utilization, business and industry experiences, and student organization development?</p> <p>COMMENTS:</p>	<p>Review strategic plan for program. Review state reports and available supplemental materials.</p>	<p><input type="checkbox"/> Met <input type="checkbox"/> Not Met</p>

All Quality Indicators marked with a screen must be met in order to meet the standard.

INSTRUCTIONAL MATERIALS UTILIZATION

STANDARD TWO

The availability and proper utilization of instructional materials is considered essential to conducting quality occupational training. Schools offering such programs shall ensure that adequate amounts of such materials, including state instructional materials, audiovisual aids, reference texts, competency profiles, etc., are made available for instructional purposes. Teachers shall utilize a variety of instructional materials and methods in accordance with student needs and the goals and objectives of the training program.

QUALIFIED INSTRUCTIONAL PERSONNEL

STANDARD THREE

Selecting, developing, and retaining instructional staff who are competent to meet the needs of career and technology training is vital to the success of the program. Realizing that occupational instruction is unique in education, all instructors shall have an adequate general education along with recent work experience that will enable them to relate their instruction to business or industrial methodology. As evidence of proper preparation, all occupational teachers shall meet or exceed state certification requirements and will hold a current teaching certificate or credential appropriate to their subject area. In addition to these minimums, all occupational instructors should continuously strive to upgrade their skills and knowledge by meeting recertification requirements and attending professional improvement meetings, state conferences, etc.

ENROLLMENT AND STUDENT/TEACHER RATIO

STANDARD FOUR

The teaching load (student/teacher ratio) will vary with the program, contingent upon the number/kinds of students to be served, the specific skills to be taught, the size of the facility, and the method of instruction to be used. However, reasonable enrollment limits must be maintained in order to ensure that program objectives may be met in an efficient and effective manner. Unless otherwise specified, program enrollment limits shall be maintained in each program in accordance with the state operations and procedures requirements.

INSTRUCTIONAL FACILITIES

STANDARD SIX

Physical facilities for occupational programs shall include adequate space and utilities in classrooms, laboratories, and shop areas which provide for safe and orderly, quality instruction to meet the program's objectives. Both instructional and non-instructional areas, including storage areas, restrooms, and offices, shall be adequate for the number of students and staff using such areas. SAFETY TRAINING AND PRACTICES

STANDARD SEVEN

Due to the nature of career and technology training and related employment, student safety and safety training are considered essential to quality program operations. Schools offering occupational programs shall ensure that safety features in the instructional facilities and equipment are properly implemented and maintained. In addition, adequate lighting, temperature, and ventilation shall be provided to ensure a safe and healthy learning environment. The Occupational Safety and Health Administration (OSHA) standards shall be used to guide the implementation of environmental health and safety features.

Instructors shall model correct safety practices and shall ensure that safety training is incorporated into the instructional content of the training program. Student safety practices shall also be encouraged and continuously monitored by the teacher.

PROGRAM ADVISORY COMMITTEE AND COMMUNITY RELATIONS

STANDARD EIGHT

An effective and continuous program of community relations is necessary to maintain a close working relationship with business, industry, and other organizations and individuals, as well as to ensure that occupational education is relevant to the needs of students. The purpose of a community relations effort is to inform the public of the program's operations and capabilities and to generate active participation in the development and implementation of the program's goals.

Each occupational program should actively strive to encourage community involvement and to promote a greater understanding of the program's needs and accomplishments. In addition, each program shall have a formally organized program advisory committee that is broadly representative of the school community and of the business and industrial community it serves. Each local program shall maintain on file a list of the names and occupations of the advisory committee members and the minutes of each meeting.

LEADERSHIP DEVELOPMENT

STANDARD NINE

Student leadership development activities are considered an integral part of the course of instruction in all occupational programs. Each student shall be afforded the opportunity to become an active member of an appropriate career and technology student organization. The leadership development activities associated with the student organization shall be directed and supervised by the local teacher with guidance from the local school administration and the state supervisory staff.

COORDINATION ACTIVITIES

STANDARD TEN

Cooperative career and technology education is uniquely designed to meet students' occupational objectives through supervised on-the-job training or other supervised occupational experiences, coupled with regular classroom instruction. Each student participating in cooperative training should be placed in a job related to his/her occupational objective and training program. The instructor should ensure that each student's cooperative training provides experiences that allow the student to meet the goals and objectives of his/her training program.

The cooperative career and technology education program should ensure that students are legally employed if their cooperative training involves working for pay. As a condition of their employment, a "Memorandum of Training" shall be signed by the employer, student, parent, and teacher-coordinator, and shall be maintained on file. In addition, a training plan outlining the on-the-job training activities for each student shall be completed and maintained on file.

In order to assure quality of training and procedural compliance, the local teacher-coordinator shall visit each training station at least once per grading period. Provisions should also be made for the local teacher-coordinator to visit each training station in accordance with state guidelines. Students should be encouraged to develop teacher-assisted entrepreneurship programs, where such programs are related to the instructional content of the training program.

STUDENT ACCOUNTING AND REPORTS

STANDARD ELEVEN

Recognizing that the major objective of occupational education is the gainful employment of the student, a systematic program of job placement and follow-up is essential. As evidence of efforts to achieve this objective, each local educational institution shall maintain student enrollment, placement, and follow-up records on all students who have enrolled in occupational programs. These records must be maintained in accordance with divisional requirements and reported as requested to the Oklahoma Department of Career and Technology Education. Each program purporting to train students for gainful employment shall assist program completers in job placement and maintain placement records.

In exploratory programs or in programs where students move from Program I to Program II, program completers should be assisted in continuing their occupational education or assisted in job placement. Enrollment, placement, continuing education, and follow-up records should be maintained for these programs.
