National Standards	
Plant Systems (PS)	PS.01.02.01.a Diagram a typical plant cell and identify plant cell organelles and their functions.
	PS.01.02.02.a Identify the components, the types and the functions of plant roots.
	PS.01.02.02.b Identify root tissues and explain the pathway of water and nutrients into and through the root tissues.
	PS.01.02.03.a Identify the components and functions of plant stems.
	PS.01.02.04.a Discuss leaf morphology and the functions of leaves.
	PS.01.02.05.a Identify the components of a flower, the functions of a flower and the functions of flower components.
	PS.01.02.06.a Explain the functions and components of seeds and fruit.
	PS.01.03.01.a Explain the basic process of photosynthesis and its importance to life on Earth.
	PS.01.03.04.a Identify the five groups of naturally occurring plant hormones and synthetic plant growth regulators.
	PS.01.03.04.b Identify the plant responses to plant growth regulators and different forms of tropism.
	PS.02.03.01.a Identify the essential nutrients for plant growth and development and their major functions.
	PS.02.03.04.a Identify fertilizer sources of essential plant nutrients, explain fertilizer formulations and describe different methods of fertilizer application.
	PS.03.01.01.b Diagram the process of plant fertilization.
	PS.03.03.01.a Identify types of plant pests and disorders.
	PS.03.03.01.b Identify major local weeds, insect pests and infectious and noninfectious plant diseases.
	PS.03.03.02.a Describe damage caused by plant pests and diseases.
	PS.03.03.03.a Describe pest control strategies associated with integrated pest management.
	PS.03.03.03.b Describe types of pesticide controls and formulations.
	PS.03.03.04.a Explain risks and benefits associated with the materials and methods used in plant pest management.
	Power, Structural and Technical Systems (PST)
