Questionmark Secure requires the following software to run:

- **Windows 7, 8, or 10**

Downloading Questionmark Secure for Windows

Questionmark Secure for Windows can be downloaded from [Get Questionmark Secure](#).

Installing Questionmark Secure for Windows

To install Questionmark Secure for Windows:

1. Right-click the installer & choose to Run as Administrator. *(If it doesn't prompt for the Administrator credentials, the Administrator will need to login and install with option to Share with all users.)*
2. Click **Next**.
3. Accept the license agreement, and click **Next**.
4. Change the destination folder in which you would like to install Questionmark Secure, or use the default location.
5. The next step depends on the kind of user you are:
 - If you are an administrative user, select whether you would like to install Questionmark Secure for **Anyone who uses this computer**.
 - If you are a standard user, **Only for me** is automatically selected.
6. Click **Next**.
7. Click **Install**.
8. Once installation is complete, click **Finish**.

FAQ

I already have Questionmark Secure and I'm being prompted to download a 'QMSB' file. What should I do?

Download and open the QMSB file. Opening the QMSB file will launch the Questionmark Secure browser and your assessment.
