Overview

This study guide is designed to help students prepare for assessments related to Law and Public Safety. It not only includes information about each assessment, but also the skills standards upon which each assessment is based, resources that can be used to prepare for the assessments and test taking strategies.

Each of the four sections in this guide provides useful information for students preparing for the Law, Public Safety, Security and Corrections Core assessment and Law Enforcement I assessment.

These assessments were developed in partnership with the National Partnership for Careers in Law, Public Safety, Security and Corrections, an organization dedicated to building partnerships to create, improve and sustain law enforcement, fire and emergency services, corrections, security and law career programs and systems. It measures a student’s ability to apply knowledge of the skills necessary for success in all careers in the law enforcement and criminal justice sector.

The Law Enforcement I assessment is directly aligned with the Law Enforcement I curriculum available through the Curriculum and Instructional Materials Center (CIMC), a division of Oklahoma CareerTech. To order Law Enforcement I curriculum, please go to www.okcimc.com.

CareerTech and Competency-Based Education: A Winning Combination

Competency-based education uses learning outcomes that emphasize both the application and creation of knowledge and the mastery of skills critical for success. In a competency-based education system, students advance upon mastery of competencies, which are measurable, transferable outcomes that empower students.

Career and technology education uses industry professionals and certification standards to identify the knowledge and skills needed to master an occupation. This input provides the foundation for development of curriculum, assessments and other instructional materials needed to prepare students for wealth-generating occupations and produce comprehensively trained, highly skilled employees demanded by the work force.

Tools for Success

CareerTech education relies on three basic instructional components to deliver competency-based instruction: skills standards, curriculum materials, and competency assessments.

Skills standards provide the foundation for competency-based instruction and outline the knowledge and skills that must be mastered in order to perform related jobs within an industry. Skills standards are aligned with national skills standards and/or industry certification requirements; therefore, a student trained to the skills standards is equally employable in local, state and national job markets.

Curriculum materials and textbooks contain information and activities that teach students the knowledge and skills outlined in the skills standards. In addition to complementing classroom instruction, curriculum resources include supplemental activities that enhance learning by providing opportunities to apply knowledge and demonstrate skills.

Certification Assessments test the student over material outlined in the skills standards and taught using the curriculum materials and textbooks. When used with classroom performance evaluations, certification assessments provide a means of measuring occupational readiness.

Each of these components satisfies a unique purpose in competency-based education and reinforces the knowledge and skills students need to gain employment and succeed on the job.

Measuring Success

Evaluation is an important component of competency-based education. Pre-training assessments measure the student’s existing knowledge prior to receiving instruction and ensure the student’s training builds upon this knowledge base. Formative assessments administered throughout the training process provide a means of continuously monitoring the student’s progress towards mastery.

Certification assessments provide a means of evaluating the student’s mastery of knowledge and skills. Coaching reports communicate assessment scores to students and provide a breakdown of assessment results by standard area. The coaching report also shows how well the student has mastered skills needed to perform major job functions and identifies areas of job responsibility that may require additional instruction and/or training.
Assessment Information

What is the Law, Public Safety, Security, and Corrections Core assessment and the Law Enforcement I assessment?

The Law, Public Safety, Security & Corrections Core assessment and Law Enforcement I assessment are end-of-program assessments for students in law enforcement, criminal justice, security and or corrections programs. The assessments provide an indication of student mastery of basic knowledge and concepts necessary for success in careers in these areas.

How was the assessment developed?

The assessments were developed by the CareerTech Testing Center in partnership with the National Partnership for Careers in Law, Public Safety, Corrections & Security. Items for the core assessments were developed and reviewed by a committee of subject matter experts from several states, including Michigan, North Carolina, Alaska, Ohio, Oklahoma, and Texas. In addition, students from across the United States assisted with beta-testing the assessment.

Items for the Law Enforcement I assessment were also reviewed by a panel of subject matter experts with many years experience in both law enforcement and education.

What does the assessment cover?

The core assessment is aligned to the Knowledge and Skills Statements for the Law, Public Safety, Security and Corrections cluster that were developed by the States’ Career Clusters Initiative. Specifically, the test includes 75 multiple-choice questions over the following areas:

**Law, Public Safety, Security and Corrections Core**

- Demonstrate an Understanding of the Juvenile Justice System 5%
- Demonstrate an Understanding of Search and Seizure 5%
- Understand Traffic Codes and Enforcement 8%
- Demonstrate an Understanding of Trials, Sentencing, and Corrections 9%

What are the benefits of using these assessments?

Students receive a certificate for each assessment that he/she passes. This certificate may be included in his/her portfolio and used to communicate the student’s mastery of the subject matter to potential employers.

The Law Enforcement I assessment measures how well the student understands foundational knowledge for those pursuing a career in law enforcement.

When should assessments be taken?

The CareerTech Testing Center recommends that students take the appropriate assessment as soon as possible after receiving all standards-related instruction, rather than waiting until the end of the school year.

Are the assessments timed?

No. Although students may take as long as they need, most finish the assessment within one hour.

What resources can students use on these assessments?

Students are allowed to use calculators and scratch paper on CTTC assessments; however, these items must be provided by the testing proctor and returned to the proctor before the student’s exam is submitted for scoring. Calculator apps on cell phones and other devices may not be used on these assessments.
What accommodations can be made for students with Individualized Education Plans (IEPs)?

Accommodations are allowed for students with an Individualized Education Plan. Examples of allowable accommodations include:

- **Extended time** — For assistance with meeting this accommodation, please contact the CareerTech Testing Center at (405) 743-5412. Each assessment must be completed in one testing session.
- **Readers** — A reader may be used to read an assessment to a student who has been identified as needing this accommodation.
- **Enlarged text** — Students needing this accommodation can activate this feature by clicking the `A A` icon in the upper right corner of the screen.

What can students expect on Test Day?

All CTTC assessments are web-based and delivered exclusively by a proctor in the school’s assessment center. The proctor **cannot** be an instructor or anyone who was involved with the student during instruction.

Assessments are delivered in a question-by-question format. When a question is presented, the student can select a response or leave the question unanswered and advance to the next question. Students may also flag questions to revisit before the test is scored. All questions must be answered before the test can be submitted for scoring.

Can students retake the test?

Students may retake the test unless their school or state testing policies prohibit retesting. Students who can retest must wait at least three days between test attempts.

Test Taking Strategies

This section of the study guide contains valuable information for testing success and provides a common-sense approach for preparing for and performing well on any test.

General Testing Advice

1. Get a good night’s rest the night before the test — eight hours of sleep is recommended.
2. Avoid junk food and “eat right” several days before the test.
3. Do not drink a lot or eat a large meal prior to testing.
4. Be confident in your knowledge and skills!
5. Relax and try to ignore distractions during the test.
6. Focus on the task at hand — taking the test and doing your best!
7. Listen carefully to the instructions provided by the exam proctor. If the instructions are not clear, ask for clarification.

Testing Tips

1. Read the entire question before attempting to answer it.
2. Try to answer the question before reading the choices. Then, read the choices to determine if one matches, or is similar, to your answer.
3. Do not change your answer unless you misread the question or are certain that your first answer is incorrect.
4. Answer questions you know first so you can spend additional time on the more difficult questions.
5. Check to make sure you have answered every question before you submit the assessment for scoring — unanswered questions are marked incorrect.
