

Who can offer the course? Each course is identified by **BITE** and/or **ME** to indicate which program can offer the course. See last page of this document for CareerTech BMITE course certification requirements.

- Business and Information Technology (BITE)
- Marketing (ME)

Oklahoma's Promise. Oklahoma's Promise allows students whose families earn \$55,000 or less annually, and who meet academic and conduct requirements to earn a college tuition scholarship. Courses listed below that have Oklahoma's Promise computer technology credit associated with them are identified beside the course title. High school students may count a minimum of two credits but may count up to three credits for computer technology towards high school graduation and college entrance. <https://www.okhighered.org/okpromise/>

BPA/DECA. In all BMITE courses, students will develop their leadership potential through participation in DECA (an association of marketing students) or Business Professionals of America (BPA). More information about the CareerTech student organizations at <https://decaok.org> and <https://bpaok.org>.

Course Syllabi. Individual course syllabi and sequence of courses can be downloaded from the BMITE ctYou.org site. Contact the BMITE office for access information.

8206 2D Animation Techniques – 1 unit (BITE, ME)

Students will utilize digital animation software to create finished animations, cartoons, and other short movies that utilize animated text, character movements that include walk cycles, turnarounds, voice (lip syncing), background sound, sound effects, camera movements, and include multiple scenes.

8208 3D Animation – 1 unit (BITE)

Students will utilize advanced 3D animation tools and techniques to produce professional motion graphics.

8107 Accounting I – 1 unit (BITE, ME)

This course will provide students with a strong foundation in generally accepted accounting principles and techniques needed for success in careers in accounting or other business related fields.

8108 Accounting II – 1 unit (BITE, ME)

This course will provide students with a strong foundation in advanced accounting principles and techniques needed for success in careers in accounting or other business related fields.

8104 Administrative Technologies II (Oklahoma's Promise) – 1 unit (BITE)

This course builds on *Fundamentals of Administrative Technology* skills and provides students with the ability to utilize, analyze, and manipulate data through a database application. The integration of multiple applications builds critical thinking skills as students utilize the appropriate applications needed to complete case projects.

8259 Advanced Database Concepts Using Access (Oklahoma's Promise) – 1 unit (BITE)

This course builds on basic skills of relational database management systems utilizing Microsoft Access to create and maintain databases. Students will create a database; add, change and delete data; sort data; retrieve data; create forms and reports; and integrate data from other applications. These skills will help prepare students for a wide range of high demand career fields that involve analyzing data to drive business decisions.

8155 Advanced Design Techniques (Oklahoma's Promise) – 1 unit (BITE, ME)

Students will enhance web design and animation skills as they master design techniques and methods that will empower them to become accomplished web designers as they bring ideas to life.

8156 Advanced Digital Animation – 1 unit (BITE)

Students will utilize action-scripting and advanced multimedia and web video production techniques to deliver dynamic, data-driven content to any audience, increasing the standards for layout, design and production.

8190 Advanced Digital Video Tools and Techniques – 1 unit (BITE)

Students will be exposed to emerging technology as they utilize digital video equipment and software to enhance productions. Students will generate/package projects for a wide degree of playback compatibility.

8617 Advanced Entrepreneurship – 1 unit (BITE, ME)

This course is designed to provide a detailed study of all aspects related to starting a business. The course includes the basic fundamentals of marketing and business operations and advanced topics to consider when preparing for business ownership. Through self-assessment activities, students will identify their potential for creating a business or a marketable product/idea. Students will apply what they learn by developing their own detailed business plan. Self-employment is presented as a viable career option.

8160 Advanced Programming (Oklahoma's Promise) – 1 unit (BITE)

Students will be able to demonstrate an understanding of programming languages by implementing and writing programs employing various techniques.

8258 Advanced Spreadsheet Applications (Oklahoma's Promise) – 1 unit (BITE)

This course builds on spreadsheet fundamental skills developed in *Fundamentals of Administrative Technologies* and focuses on advancing those spreadsheet skills to an expert level. This course will utilize advanced functions of spreadsheet applications to produce sophisticated reports and perform complex mathematical and statistical calculations. Students will create professional spreadsheets for use in an office environment, such as a budget, sales and revenue analysis, payroll, and debt analysis.

8612 Advertising Strategies – 1 unit (ME)

This course studies the basic functions of advertising; its role in marketing communications; economics, consumer behavior, and social influence. Students explore advertising techniques and the technology used in advertising institutions and media; campaigns and appropriations; retail and business-to-business aspects to develop and implement a promotional plan.

8853 AP Computer Science A (CSA) (Oklahoma's Promise) – 1 unit (BITE)

The course introduces students to computer science with fundamental topics that include problem solving, design strategies and methodologies, organization of data, approaches to processing data (algorithms), analysis of potential solutions, and the ethical and social implications of computing. It emphasizes both object-oriented and imperative problem solving and design using Java language. These techniques represent proven approaches for developing solutions that can scale up from small, simple problems to large, complex problems. (STEM course)

8851 AP Computer Science Principles (CSP) (Oklahoma's Promise) – 1 unit (BITE)

This course is designed to be equivalent to a first-semester introductory college computing course. Students will develop computational thinking skills vital for success across all disciplines, such as using computational tools to analyze and study data and working with large data sets to analyze, visualize, and draw conclusions from trends. Students will be engaged in the creative aspects of the field by allowing them to develop computational artifacts based on their interests. Students also develop effective communication and collaboration skills by working individually and collaboratively to solve problems, and will discuss and write about the impacts these solutions could have on their community, society, and the world. (STEM course)

8261 Artificial Intelligence (Oklahoma's Promise) – 1 unit (BITE)
Students will learn foundational Machine Learning (ML) and Artificial Intelligence (AI) concepts and how to implement them using guiding principles that include ethical and legal considerations. Technologies incorporated into this course include search, machine learning, natural language processing, and robotics.

8234 Awareness of GPS/GIS – 1 unit (BITE, ME)
This is an introductory course using GPS (Geographical Positioning System) and GIS (Geographic Information System). It covers basic concepts of GIS and GPS and how they are used for decision making. Students work with GPS units and GIS mapping software to find features of interest, analyze patterns, and derive useful information.

8120 Banking and Financial Services – 1 unit (BITE)
This course will provide students with the ability to recognize principles and practices of banking and credit. Students will calculate mathematical computations needed in banking and credit practices; consider technological advances and their impact on the banking industry; utilize critical thinking in researching and interacting with community financial institutions; and solve real-world business problems.

8225 Basic Programming – 1 unit (BITE)
Students will demonstrate an understanding of programming languages by implementing and writing programs employing various techniques. This course may utilize Basic or Liberty Basic programming language.

8238 Beginning Android Development – 1 unit (BITE)
This course introduces the basics of Android OS and platform, as well as some popular devices in the market. Students learn to download and install the required tools to develop Android applications and test them on the Android Emulator. Students create Apps that use Activities and Intents; analyze the components of UI and build UI for an Android device; design different types of views, create menus, and display images that enhance the end user experience; manipulate data that can be stored internally or externally; analyze use of content providers and create their own content provider. Students publish Android applications that are ready for distribution.

8194 Broadcast Production – 1 unit (BITE, ME)
Customer service, marketing, project management techniques and professionalism will be emphasized as students complete video-based projects for broadcast production. Students complete numerous projects that will be included in their portfolios as they acquire skills in advanced video editing and production.

8611 Business and Marketing Communications – ½ unit (ME)
This course applies marketing skills developed through a variety of informal and formal experiences. The performance-based course will emphasize effective interpersonal and team building skills along with written and oral communication techniques. Technology will be used to create and deliver presentations, enhance problem-solving situations, and practice critical thinking and decision-making. Job interview, research paper, and/or projects will culminate this course.

8118 Business and Personal Finance – 1 unit (BITE, ME)
This course will provide students with the skills to manage personal finances, identify the characteristics of effective business financial goals, and examine the organization and activities of commercial banks and other financial institutions. Students will examine case studies and complete teamwork projects which require critical thinking for the financial aspect of business in banks, other financial institutions, business insurance, and the operations of technology and financial management in the global setting.

8177 Business Communications – 1 unit (BITE, ME)
This course delivers knowledge of communicating in the workplace. Students learn the skills necessary to communicate effectively with coworkers at all levels and with external business contacts.

- 8254 Business Foundations – ½ or 1 unit** (BITE, ME)
The purpose of this course is to assist middle school students (grades 7-8) in making informed decisions regarding future academic and occupational goals and to provide information and foundational training regarding careers in these career clusters: Business Management and Administration; Finance; Hospitality and Tourism; Information Technology; and Marketing. Through project-based instruction students are introduced to the principles of business and computer technology for these clusters while reinforcing keyboarding skills.
- 8102 Business Information Technology Internship – 1 unit** (BITE)
This course provides students with the opportunity for a business/information technology internship that aligns with their BMITE program of study. Students must have completed a minimum of 120 clock hours (1 unit of credit) of *CareerTech* business/information technology curriculum in order to be eligible for an internship (can be taken in conjunction with the internship course). Students must maintain employment at an approved worksite that is in direct relation to the business/information technology courses the student has taken or is currently enrolled in.
- 8606 Business Management and Supervision – 1 unit** (ME)
This course studies the planning, organizing, directing, and controlling the use of an organization's resources to effectively and economically attain its objectives. Students learn the art and science of management and supervision in problem-solving, decision making, and working with other people to accomplish common goals.
- 8625 Buying and Merchandising – ½ unit** (ME)
This is an introductory course designed to explore the role and responsibility of a buyer and merchandiser. It covers the job skills necessary to prepare for the role of a buyer or merchandiser including the ability to use mathematic formulas, budgeting, research, making purchases, and additional responsibilities of the buyer.
- 8166 C# Programming (Oklahoma's Promise) – 1 unit** (BITE)
Students will use C# to create event-driven programs, and expand their knowledge of C# as used in business applications both for Windows and for the Web.
- 8165 C++ Programming (Oklahoma's Promise) – 1 unit** (BITE)
Students will use C++ to write object-oriented programs, and develop advanced C++ applications using user interface components.
- 8106 Capstone – 1 unit** (BITE, ME)
Internships, project-based instruction and additional industry certifications will be utilized to reinforce skills obtained within any Business, Marketing, and Information Technology Education (BMITE) state program area. Students will make final preparations for industry certifications as they master competencies; select from various project options to finalize portfolios that highlight skills and certifications; and may undertake special projects, cross-train or participate in work-based experiences to enhance skills in accordance with industry demands.
- 8136 Computer Repair and Troubleshooting I (Oklahoma's Promise) – 1 unit** (BITE)
In this course, students will prepare for positions related to the maintenance of computers and computer-related equipment through hands-on and project-based learning, textbook assignments, and Internet research. The focus of this course is the hardware area.
- 8137 Computer Repair and Troubleshooting II (Oklahoma's Promise) – 1 unit** (BITE)
In this course, students will prepare for positions related to the maintenance of computers and computer-related equipment through hands-on and project-based learning, textbook assignments, and Internet research. The focus of this course is software and operating systems.

- 8867 Computer Science Discoveries (Oklahoma's Promise) – 1 unit** (BITE)
This course is appropriate for 6-10th grade students and can be taught as a semester or year long introductory course. It takes a wide lens on computer science by covering topics such as programming, physical computing, HTML/CSS, and data. Students engage with computer science as a medium for creativity, communication, problem solving, and fun. Students build websites, apps, games, and physical computing devices. (STEM course)
- 8852 Computer Science Essentials (Oklahoma's Promise) – 1 unit** (BITE)
This course will enable students to develop computational thinking skills that prepares them to advance to Computer Science Principles and Computer Science A. (STEM course)
- 8860 Computer Science Principles (Oklahoma's Promise) – 1 unit** (BITE)
This course introduces students to the foundational concepts of computer science and challenges them to explore how computing and technology can impact the world. More than a traditional introduction to programming, it is a rigorous, engaging, and approachable course that explores many of the foundational ideas of computing so all students understand how these concepts are transforming the world we live in. (STEM course)
- 8109 Computerized Accounting (Oklahoma's Promise) – 1 unit** (BITE, ME)
This course is designed to integrate accounting principles using computerized accounting system(s).
- 8229 Customer Assistance** (BITE, ME)
This course provides students with customer service concepts, including assessing customer needs, educating customers, solving problems, and making decisions. Students learn competencies required to pass industry certifications in addition to securing and holding jobs.
- 8605 Customer Service – ½ unit** (ME)
This is a course of study in basic customer service concepts with an emphasis on exploring elements of the service industry, assessing customer needs, educating customers, selling processes, solving problems, making decisions, leading others, working in teams, applying technology, organizing and planning, building consensus, and setting goals. Students learn competencies required to pass industry certifications and secure and hold jobs.
- 8256 Cybersecurity Basics (Oklahoma's Promise) – 1 unit** (BITE)
Students will learn defensive and hardening techniques used in a Windows, Cisco, and Linux environment, along with the ethical behaviors needed to be successful in industry.
- 8142 Database Administration (Oklahoma's Promise) – 1 unit** (BITE)
This course will provide instruction for students to perform database administration duties.
- 8140 Database Design and Programming (Oklahoma's Promise) – 1 unit** (BITE)
In this course, students will apply data modeling concepts as they develop and perform relational database queries using SQL concepts.
- 8154 Design Tools and Electronic Marketing Strategies (Oklahoma's Promise) – 1 unit** (BITE, ME)
In this course, students will become proficient in the use of premier, leading edge tools designed to create graphically rich and intuitive websites, productions, and/or publications. The primary focus of this course includes color and design theories, accessibility, and marketing strategies resulting in a digital portfolio.
- 8145 Desktop Publishing Fundamentals – 1 unit** (BITE, ME)
Students will learn basic design processes, key design elements and graphic design skills. This course can be offered in grades 6-9.

- 8149 Desktop Publishing and Graphic Design (Oklahoma's Promise) – 1 unit** (BITE, ME)
In this course, students will acquire skills related to communicating through visual design with the primary emphasis of this course being desktop publishing and working with graphics.
- 8151 Digital Editing and Production Photography – 1 unit** (BITE, ME)
In this course, students will acquire skills in digital photography. Additionally, students will understand certification standards and copyright basics.
- 8191 Digital Media Production – 1 unit** (BITE, ME)
In this course, students will prepare for careers in digital communication as they learn to develop personal and professional videos applying appropriate certification and copyright standards.
- 8628 Digital Marketing – 1 unit** (BITE, ME)
This course focuses on the ways in which traditional marketing strategies can be applied to the digital world. Students will explore high-level approaches to marketing strategies utilizing mobile technology, social media, and search engine optimization (SEO).
- 8260 Drone Technology – 1 unit** (BITE, ME)
Students will learn essential theory and design concepts of small, unmanned aircraft systems. These technologies include airframes, electric motors, propellers and other basic knowledge required for successfully piloting a drone craft.
- 8619 E-Commerce Marketing – 1 unit** (ME)
This course focuses on the development of communication and marketing strategies for effective electronic commerce to take place. It will include market products/services, use of the Internet, identify markets, and communicate with them. The course provides an overview of the marketing activities businesses need to perform in order to maximize return and meet customer expectations with electronic purchases.
- 8623 Employment Essentials – ½ unit** (ME)
This course is designed to provide students with fundamental workplace knowledge and skills to succeed in any career. Students develop soft skills, personality traits, personal management, and basic technology skills desired by employers. They explore techniques to manage their personal life, financial life, and career preparation.
- 8616 Entrepreneurship – 1 unit** (ME)
This course will provide students with fundamental concepts, principles and ideas needed to understand the basics of entrepreneurship in business management. Skills demonstrated are as follows: develop a Business Plan, Identify Marketing Needs, Insurance Concepts pertaining to a business, how to market a business, maintain records and accounting processes, manage finances, integrate technology into the business functions, apply legal, ethical and social obligations, and analyze the growth of today's marketplace
- 8620 Entrepreneurship Awareness – 1 unit** (ME)
This course introduces students to the concept of entrepreneurship. Students acquire knowledge of the nature and scope of entrepreneurship. Students will explore the relationship between entrepreneurship, business and marketing skills, creative instincts, self-esteem/discipline and independence. Career opportunities and pre-employment skills required for success in business, marketing, and management will be introduced.
- 8235 Essential Skills for ArcGIS – 1 unit** (BITE, ME)
This course will introduce ArcGIS software to students.

- 8629 Ethical Leadership – ½ unit** (BITE, ME)
This course is a principles-based ethics course introducing students to key leadership and ethical knowledge and skills, including integrity, trust, accountability, transparency, fairness, respect, rule of law, and viability. Students apply ethical principles to contemporary, real-world situations that teens and young adults often encounter in school, at home, with friends, and entry-level job positions. They examine the concept of ethical leadership and strengthen their leadership and ethical decision-making skills through the planning, implementation, and evaluation of a class service-learning project.
- 8207 Fundamentals of 3D Motion Graphics – 1 unit** (BITE)
In this course, students will become familiar with 3D motion graphics as they create, animate, revise, optimize and export 3D graphics and animations.
- 8103 Fundamentals of Administrative Technologies (Oklahoma’s Promise) – 1 unit** (BITE, ME)
This course builds on core business skills and will provide students with the concepts, principles, and attitudes needed to understand how an office is operated and managed in a rapidly changing global environment. State-of-the-art personal computing is integrated throughout the course.
- 8139 Fundamentals of Database Development (Oklahoma’s Promise) – 1 unit** (BITE)
In this course, students will develop an understanding of data modeling concepts as they create relational databases and use SQL to manipulate data.
- 8169 Fundamentals of Technology (Oklahoma’s Promise) – 1 unit** (BITE, ME)
This course provides students with fundamental concepts, principles, and ideas needed to understand how business is operated and managed in a rapidly changing technical environment. It provides job readiness and soft skills critical for success in any workplace setting.
- 8228 Fundamentals of Video Game Design – 1 unit** (BITE)
Students will be introduced to the concepts and methods for the design and development of computer games. Topics include: history of games, 2D graphics and animation, sprites, 3D animation, binary space partition trees, software engineering, game design, interactive fiction, user interfaces, artificial intelligence, game SDK's, networking, multi-player games, game development environments, and commercialization of software.
- 8153 Fundamentals of Web Design (Oklahoma’s Promise) – 1 unit** (BITE, ME)
Students will acquire fundamental web authoring skills and design strategies through the application of XHTML incorporating Cascading Style Sheets and future trends in web programming/scripting. Once XHTML foundation skills are achieved, students will utilize a WYSIWYG editor and/or a graphics application package to produce standards based web sites.
- 8245 Gaming Development Fundamentals – 1 unit** (BITE)
This course helps develop core gaming development skills that includes a solid foundational knowledge of game design, hardware, graphics, and animation. It is recommended that students be familiar with general game development concepts and have some hands-on experience with this technologies either by taking relevant training courses or working with tutorials and samples available through sources such as MSDN and Microsoft Visual Studio.
- 8627 Global Markets and Trade – 1 unit** (ME)
This course is designed to help students explore the demand for goods and service exports. Key topics will include e-commerce, export financing, export marketing, strategic alliances, and foreign investments. Students will determine the decision-making skills needed to interact with foreign markets.

8873 Google Tools (Oklahoma's Promise) – 1 unit (BITE)

This course will teach students how to effectively use Google products and services. Students will create a Google account and learn of its many benefits. They will practice navigating the general interface of Google products. Searching, organizational, communication, and collaboration components of Google products will be highlighted to help students develop a deeper understanding of how Google can enhance learning. (STEM course)

8247 HTML5 Application Developer Fundamentals – 1 unit (BITE)

This course focuses on core HTML5 client application development skills that will run on today's touch-enabled devices (PCs, tablets, and phones). It focuses on using HTML5, CSS3, and JavaScript to develop client applications. Before taking this course, students should have solid foundational knowledge, including CSS and JavaScript. It is recommended students be familiar with the concepts and have some hands-on experience with related technologies either by taking relevant training courses or by working with tutorials and samples available on MSDN and in Microsoft Visual Studio.

8213 Interactive Marketing Techniques – 1 unit (BITE, ME)

Students will research marketing strategies and utilize appropriate design principles as they develop a brand identity for a business. Productivity tools will be utilized to create assets and build customer relations through electronic marketing techniques.

8618 International Business and Marketing – 1 unit (ME)

This course of study includes the basic fundamentals of marketing and business operations with emphasis on the economic advantages and disadvantages of international trade, importance of understanding cultures and customs, interdependence of nations, and trade balances. Students will gain an understanding of opportunities available in international business and required skills to succeed.

8614 Introduction to Business/Marketing – ½ unit (BITE, ME)

This is an introductory course designed to explore the business and marketing system and its role in our free enterprise economic system. Students will gain an understanding of the marketing concept and its relations to production of goods and services. Students will study the responsibilities and role of an individual in today's business and economic environment as a consumer and a producer of goods and services. Career opportunities within business and marketing fields will also be introduced to students.

8179 Introduction to Entrepreneurship – 1 unit (BITE)

This course helps students discover what an entrepreneurial career entails. Students will look at the relationship between entrepreneurship and business skills and learn about career opportunities and skills needed to become an entrepreneur.

8448 Introduction to Hospitality and Tourism – ½ unit (BITE, ME)

This course is an overview of the hospitality and tourism industry. Students will study facets of tourism including food service, lodging, travel, tourism, and recreation and attractions. Guest speakers, real or virtual tours to various tourism venues will introduce students to career opportunities within hospitality and tourism.

8255 Internet of Things (IoT) Fundamentals (Oklahoma's Promise) – 1 unit (BITE)

Cisco Networking Academy's IoT Fundamentals curriculum provides a comprehensive understanding of the Internet of Things (IoT). It develops foundational skills using hands-on lab activities that stimulate students in applying creative problem-solving and rapid prototyping in the interdisciplinary domain of electronics, security, networking, data analytics, and business. The student-centric approach translates into being able to ideate, design, prototype and present an IoT solution for an identified business or society need. Students explore three basics IoT insights: Why do we want to connect everything? What do we want to connect? How do we connect?

8252 IT Essentials (Oklahoma's Promise) – 1 unit (BITE)

This course provides an introduction to the technical skills needed to help meet the growing demand for entry-level ICT professionals. It covers the fundamentals of computer hardware and software, as well as advanced concepts such as security, networking, and the responsibilities of an ICT professional. Students demonstrate, in a laboratory setting, building a computer, installing the operating systems, adding peripherals and connecting the computer to a local-area network and the internet.

8230 JAVA Programming – 1 unit (BITE)

This course is designed to provide students with learning experiences to employ the concepts of object oriented programming to develop applications in the Java programming language. Concepts such as advanced program development tools, console/graphic user interfaces, and event/ exception handling are introduced.

8216 Layout Design Techniques – 1 unit (BITE, ME)

Students will be immersed in the basic elements of design and composition including typography, color, and information design. Students also focus on enhancing their creativity by producing graphical assets that incorporate design principles.

8615 Marketing Economics – ½ unit (ME)

This is a course of study in the basic economic concepts and foundations with an emphasis on the application of technology to perform marketing duties and tasks, which includes the use of word processing, databases, spreadsheets, and graphics. Course content includes topics related to economics, finance, competition, pricing, distribution channels, and international trade.

8602 Marketing Fundamentals – 1 unit (ME)

This is a course of study in the basic marketing concepts and foundations with an emphasis on the application of technology to perform marketing duties/tasks and software applications including the use of word processing, databases, spreadsheets, and graphics. Course content includes topics related to human relations, math, communication, economics, selling, promotion, risk management, distribution, and marketing trends. Students learn office and job safety, competencies required to secure and hold jobs.

8622 Marketing Internship – 1 unit (ME)

This course provides students with the opportunity for a marketing internship that aligns with their BMITE program of study. Students must have completed a minimum of 120 clock hours (1 unit of credit) of *CareerTech* Marketing curriculum in order to be eligible for an internship (or could be taken in conjunction with the internship course). Students must maintain employment at an approved worksite that is in direct relation to the marketing courses the student has taken or is currently enrolled in.

8613 Marketing Research – 1 unit (ME)

This is a specialized technology course with instruction in the following key topics: marketing research defined, importance of marketing research, use of marketing research, characteristics of marketing research, users of marketing research, ways marketing research is performed and steps in marketing research. Advanced study would include the design of a marketing research study, conduct market research, analyze the results of a research study, and prepare a promotion campaign based on research, presentation of the findings and the proposed promotion campaign.

8180 Math of Finance – 1 unit (BITE, ME)

This course provides knowledge of skill in mechanical computations of mathematics that apply to many aspects of business. Principles of mathematics are applied to real business examples to build student understanding of how to determine strategies and procedures for solving business situations.

- 8241 Mobile Development Fundamentals – 1 unit** (BITE)
This course covers core mobile development skills. Students will cover foundational topics, including Silverlight, HTML5, and other phone operating system tools. Students become familiar with the concepts of and have hands-on experience with the technologies by taking relevant training courses or by working with tutorials and samples available on MSDN and in Microsoft Visual Studio.
- 8143 Modeling Languages – 1 unit** (BITE)
In this course designed for IT professionals, students will acquire fundamentals of a variety of Modeling Languages and apply them using graphic modeling software.
- 8150 Multimedia & Image Management Techniques (Oklahoma’s Promise) – 1 unit** (BITE, ME)
Students will acquire fundamental skills in image creation and management procedures and techniques as they create, revise, optimize, and export graphics for video, print, and web publishing.
- 8223 Network Security Awareness – 1 unit** (BITE)
Students will demonstrate knowledge and competency in PC, Server, and Internet Security. Students will utilize these skills in preparation for positions related to the maintenance of computers and computer-related equipment through hands-on and project-based learning, textbook assignments, and Internet research. The focus of this course is in the hardware area.
- 8192 Non-Linear Digital Editing – 1 unit** (BITE, ME)
In this course, students will master real-time editing for professional digital video productions.
- 8189 Non-Linear Digital Production – 1 unit** (BITE, ME)
In this course, students will foster creativity and innovation while designing motion graphics and visual effects that deliver the desired results.
- 8105 Office Administration & Management (Oklahoma’s Promise) – 1 unit** (BITE)
This course builds on the Fundamentals of Administrative Technologies. It focuses on higher-level content and strategies necessary to effectively engage students in technology and managerial skills needed for success in competitive business careers. This course is designed to enhance administrative support and management skills needed in the workplace.
- 8110 Payroll Accounting – 1 unit** (BITE)
This course will provide students with a strong foundation in payroll principles and techniques needed for success in careers in accounting or other business related fields.
- 8178 Personal Finance – ½ or 1 unit** (BITE, ME)
This course is designed to provide the knowledge and skills necessary to make wise decisions for financial planning. Students will analyze choices and develop tools to assist them in wise money management. The standards set forth in the Passport to Financial Literacy Act of 2007 (70 O.S. 11-103.6h) will be taught in conjunction with the competencies listed. Personal Finance can be offered as a one- or two-semester course.
- 8220 Principles of Animation – 1 unit** (BITE, ME)
In this course students will utilize animation and storyboarding techniques to plan the production of an animation project. Students will learn to design production steps from script and storyboard actions in the pre-production planning process.
- 8624 Product and Service Sales – 1 unit** (ME)
This course is designed to provide students with fundamental workplace knowledge and skills to succeed in any career. Students will develop the soft skills, personality traits, personal management, and basic technology skills
-

desired by employers. Students will explore techniques to manage their personal life, financial life, and career preparation.

8608 Professional Sales – 1 unit

(ME)

This course focuses on the purpose of the promotional strategy of selling and its role in the marketing environment. Emphasis is placed on the purpose and steps of the sales process, and the importance of completing each step in the presentation. Technology will be used to create and deliver presentations, enhance problem-solving situations, and practice critical thinking and decision-making. Professional careers in sales will be explored.

8222 Programming Fundamentals – 1 unit

(BITE)

This course introduces fundamental concepts and terminology of software application development and develops skills in designing and writing simple computer programs. This includes fundamental concepts of software programming, including the use of pseudo code, flowcharts, statement sequencing, conditional statements, loop structures, procedural versus object oriented programming structures and input/output.

8621 Public Relations Marketing – 1 unit

(ME)

This course is designed to teach distinctive marketing management functions that help establish and maintain the lines of communications that promote concepts of marketing and business success. Students explore marketing tools used for relaying information to consumers, organizations, and the media.

8871 Python (Oklahoma's Promise) – 1 unit

(BITE)

Python is a general-purpose programming language used to build just about anything. Python is key for backend web development, data analysis, artificial intelligence and scientific computing, all of which are key for pursuing STEM careers. (STEM course)

8196 Remote/Field Production (IT) – 1 unit

(BITE, ME)

This course introduces the students to all aspects of the remote or field production environment, pre-/live-/post-production, gaining hands-on experience in various remote or field production roles.

8125 Routing and Switching I (Oklahoma's Promise) – 1 unit

(BITE)

This course is an introduction to networking that introduces the architecture, structure, functions, components, and models of the Internet and computer networks. The principles of IP addressing and fundamentals of Ethernet concepts, media, and operations are introduced to provide a foundation for the curriculum. By the end of the course, students will be able to build simple LANs, perform basic configurations for routers and switches, and implement IP addressing schemes. Students are introduced to the architecture, structure, functions, components, and models of the Internet and computer networks.

8607 Sales and Sales Promotion – ½ unit

(ME)

This is a course of study designed to prepare students with the basic knowledge and skills necessary for a career in sales. Students will discover the role of sales and sales promotion in meeting the goals of an organization. Topics include; understanding personal traits, human relation skills, product knowledge, selling principles and techniques, promotion, advertising, and state and federal laws.

8159 Scripting Language Fundamentals (Oklahoma's Promise) – 1 unit

(BITE)

Students will develop an understanding of IT concepts and techniques, and develop an understanding of basic programming concepts as they related to software programming and writing simple computer programs

8195 Studio Production (IT) – 1 unit

(BITE, ME)

This course introduces all aspects of the studio production environment, from content creation to distribution.

8167 Visual Basic .NET Programming (Oklahoma's Promise) – 1 unit**(BITE)**

Students will create event-driven programs using Visual Basic and expand their knowledge in its use in business applications for a Windows environment and for the Web.

OCAS Subject Codes for FY2022

8100 BUSINESS AND INFORMATION TECHNOLOGY

8101 Business and Computer Technology	(Oklahoma's Promise)	Technology Center only
8102 Business Information Technology Internship		
8103 Fundamentals of Administrative Technologies	(Oklahoma's Promise)	
8104 Administrative Technologies II	(Oklahoma's Promise)	
8105 Office Administration & Management	(Oklahoma's Promise)	
8106 Career Major Capstone		
8107 Accounting I		
8108 Accounting II		
8109 Computerized Accounting	(Oklahoma's Promise)	
8110 Payroll Accounting		
8111 Financial Accounting		
8112 Entrepreneurship: Business Development		
8113 Entrepreneurship: Business Management		
8114 Human Resources Concepts		
8118 Business & Personal Finance		
8120 Banking & Financial Services		
8121 Network/Client Operating Systems	(Oklahoma's Promise)	
8122 Server Operating Systems	(Oklahoma's Promise)	Technology Center only
8123 Network Management	(Oklahoma's Promise)	Technology Center only
8124 Fundamentals of Linux/Unix	(Oklahoma's Promise)	
8125 Routing and Switching I	(Oklahoma's Promise)	
8126 Routing and Switching II	(Oklahoma's Promise)	
8128 Advanced Routing and Remote Access Networks		Technology Center only
8130 Principals of Information Assurance	(Oklahoma's Promise)	Technology Center only
8131 Network Security	(Oklahoma's Promise)	Technology Center only
8132 Enterprise Security Management	(Oklahoma's Promise)	Technology Center only
8133 Secure Electronic Commerce	(Oklahoma's Promise)	Technology Center only
8134 Cyber Forensics	(Oklahoma's Promise)	Technology Center only
8136 Computer Repair and Troubleshooting I	(Oklahoma's Promise)	
8137 Computer Repair and Troubleshooting II	(Oklahoma's Promise)	
8138 Computer Repair and Troubleshooting III		
8139 Fundamentals of Database Development	(Oklahoma's Promise)	
8140 Database Design and Programming	(Oklahoma's Promise)	
8141 SQL and PL/SQL Database Applications Development	(Oklahoma's Promise)	Technology Center only
8142 Database Administration	(Oklahoma's Promise)	Technology Center only
8143 Modeling Languages		
8145 Desktop Publishing Fundamentals		
8149 Desktop Publishing and Graphic Design	(Oklahoma's Promise)	
8150 Multimedia & Image Management Techniques	(Oklahoma's Promise)	
8151 Digital Editing and Production Photography		
8153 Fundamentals of Web Design	(Oklahoma's Promise)	
8154 Design Tools and Electronic Marketing Strategies	(Oklahoma's Promise)	
8155 Advanced Design Techniques	(Oklahoma's Promise)	

8156 Advanced Digital Animation	(Oklahoma's Promise)

8159 Scripting Language Fundamentals	(Oklahoma's Promise)	
8160 Advanced Programming	(Oklahoma's Promise)	
8161 Systems Analysis, Design and Testing	(Oklahoma's Promise)	Technology Center only
8162 Advanced Scripting Languages	(Oklahoma's Promise)	
8163 Software Configuration Management	(Oklahoma's Promise)	Technology Center only
8165 C++ Programming	(Oklahoma's Promise)	
8166 C# Programming	(Oklahoma's Promise)	
8167 Visual Basic .NET Programming	(Oklahoma's Promise)	
8169 Fundamentals of Technology	(Oklahoma's Promise)	
8170 Bilingual Interpersonal Communications I		Technology Center only
8177 Business Communications		
8178 Personal Finance		
8179 Intro to Entrepreneurship		
8180 Math of Finance		
8182 Operating Systems Command Line	(Oklahoma's Promise)	Technology Center only
8184 Active Directory Infrastructure	(Oklahoma's Promise)	Technology Center only
8185 Server Infrastructure Design	(Oklahoma's Promise)	Technology Center only
8186 Regulatory Compliance and Auditing	(Oklahoma's Promise)	Technology Center only
8187 Installing and Maintaining Desktop Applications	(Oklahoma's Promise)	Technology Center only
8189 Non-Linear Digital Production		
8190 Advanced Digital Video Tools and Techniques		
8191 Digital Media Production		
8192 Non-Linear Digital Editing		
8193 Audio Production		
8194 Broadcast Production		
8195 Studio Production (IT)		
8196 Remote/Field Production (IT)		
8197 Advanced Effects for Motion Graphics		
8203 Audio Tools and Techniques		
8206 2D Animation Techniques		
8207 Fundamentals of 3D Motion Graphics		
8208 3D Animation		
8209 3D Modeling and Rigging Techniques		
8210 Web Authoring Languages		
8211 Web Authoring Tools		
8212 Web Application Technologies		
8213 Interactive Marketing Techniques		
8216 Layout Design Techniques		
8217 Server-Side Scripting		Technology Center only
8218 Web Application Development		
8219 Advanced Computer Applications for the Law Office	(Oklahoma's Promise)	Technology Center only
8220 Principles of Animation		
8221 Event and Project Planning Management		
8222 Programming Fundamentals		
8223 Network Security Awareness		
8224 Cross Platform Game Programming		
8225 Basic Programming		
8226 Resort and Tourism Management		
8227 Business Management for Travel and Tourism		

8228 Fundamentals of Video Game Design	
8229 Customer Assistance	
8230 JAVA Programming
