FA Davis CARES

Visit Davis Cares

As educators, we know this is an especially challenging time as you navigate through new models of teaching and learning. But, we are here to support you and your students, and are pleased to announce our NEW Davis Cares page!

We created Davis Cares to make it easy for Nursing and Health Professions programs to access F.A. Davis’s Distance Education resources from a single location. Our goal is to help you to create a student experience that ensures engaged, successful learning.

If you need ideas to transition to Distance Education, or are looking for ways to make your virtual classroom more interactive, visit our Davis Cares page for free access to a variety of resources including...

- Tips for using F.A. Davis products in Distance Learning
  - Instructor Resources
  - Creating assignments and activities
  - Incorporating clinical judgement skills & clinical application
  - How to use our online programs

- Open access to resources, videos, and simulated clinical experiences to engage your students
  Accessing ebook versions of F.A. Davis texts through VitalSource and RedShelf

Goodheart-Wilcox Employability Skills

Soft Skills for the Workplace

Are you planning to add soft skills content to your curriculum? G-W offers print and online resources that are flexible, effective, and affordable. Please take a minute to watch this quick video, and then let us know how we can help!
Choose *Soft Skills for the Workplace* in the format that meets your needs:

- Softcover textbook
- Online textbook, 1 yr. individual subscriptions and site licenses
- Common Cartridge®, 1 yr. individual access and site licenses

*Here is a sample for your review.* If you have any questions, please contact your G-W Educational Consultant or Customer Service at 800.323.0440 and custserv@g-w.com.

**Catch My Breath Scholarship**

This June, CATCH will award $5,000 in college sponsorships to students who help us advance the vaping prevention movement by completing a CATCH My Breath Service Learning Project.

With schools closed, it's the perfect time for youth to take the lead on this crucial issue.

The CATCH My Breath team is hosting a webinar about the Service Learning Projects on **Tuesday, April 21 at 2:00pm CST**. This is an opportunity for teachers, parents, and students to learn the ins and outs of the projects and ask questions directly to our team!

There is plenty of time to do a Service Learning Project online before the **May 15th submission deadline**, and all are welcome to attend the webinar.

**Register Now**

All of our projects are distance-learning friendly and can help students make an impact on the youth vaping epidemic.

Did we mention that there is a chance to win a college scholarship? The top 3 projects will be awarded:

- 🏆 **GOLD** - $2,500
- 🏅 **SILVER** - $1,500
BRONZE - $1,000

**Projects are due May 15th** and winners will be announced at the virtual HOSA International Leadership Conference June 23-27.

**Service Learning Project Text Alerts**

Text CATCH to 22999 to receive updates, deadline reminders, and announcements!

**Additional Resources**

CATCH My Breath has published several resources to keep up with the demand for distance learning options.

- A special addenda lesson titled *Vaping, Lung Health, & Infectious Diseases* which is available on our portal for free.
- A distance learning guide detailing how to use video conferencing software to deliver a CATCH My Breath lesson.
- Discussion questions to extend the virtual learning experience before or after a lecture.

If you are able to teach (or have already taught) the CATCH My Breath Program, students can complete the pre and post surveys.

- **Pre Surveys** are intended to be done **BEFORE** students start CATCH My Breath.
- **Post-Surveys** are intended to be done at least 3 weeks **AFTER** students complete CATCH My Breath.

Teachers - we would love to hear from you. We are taking this time to review our program and your feedback to improve it for the next school year. Please take 10 minutes to complete the survey.

**Action Item**

Share CATCH My Breath Service Learning Projects with a teacher or student!
Building an Online Clinical Day

Building an online clinical day depends on the level of the students, course/program outcomes, and the amount of time dictated for that day of clinical. In this video faculty will explore these factors and look at examples of building a clinical day.

Health Science Division of ACTE Webinar

Health Science Education in a Time of Uncertainty
The Association for Career and Technical Education and the National Consortium for Health Science Education have joined forces to host a live event featuring a panel of experts focused on the current state of education in Health Science Education. While no one has all the answers, we will share what we know, take questions, and are
eager to learn from other participants about your promising practices in the era of COVID-19. The resources mentioned in the video can be found in the chat.
